

Micha Solar

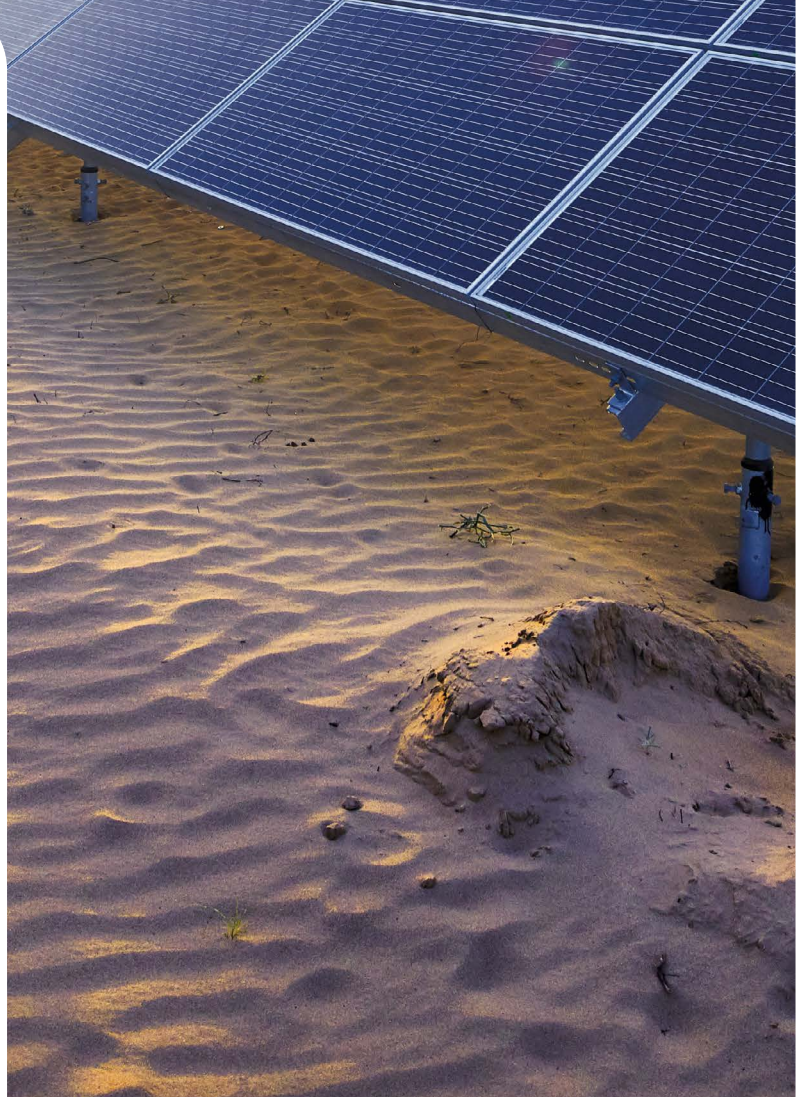

Solar Project supplies and services

Micha Solar Projects specialises in supplies & services for small and mid-scaled solar power systems for water and energy. The company can offer up to fully integrated packages. Together with a wide range of complementary products & services, Micha Solar Projects designs and produces both customised and standard solar solutions.

Partial designs, kits, and subassemblies can also be provided to suit the specific requirements of end users.

Today, the reliability of products and solutions developed by a skilled in-house team combined with a continuous policy of innovation and one of the longest track records in the solar market, makes Micha Solar one of the most reputable brands supplying the Middle East, Africa & beyond.

A FULLY INTEGRATED PACKAGE

.... **Design & Development**

Consultancy | Feasibility studies | Project management

.... **Engineering**

System Design | Sourcing costing | Drawings

.... **Manufacturing**

Product design | PCB Assembly | Mechanical Assembly

.... **Supplies**

Procurement | Storage | Logistics

.... **Technical Support**

Testing/FAT | Commissioning | Supervision

.... **Training**

Technicians | Engineers | Customers

APPLICATIONS

Off-Grid industrial

Wellhead Control Panels
Cathodic Protection Controllers
Chemical Injection Skids
Motor Operated Valves & Monitoring Systems
Telecoms

Community & Residential

Rural Electrification
Public buildings
Water supply & treatment
Residential

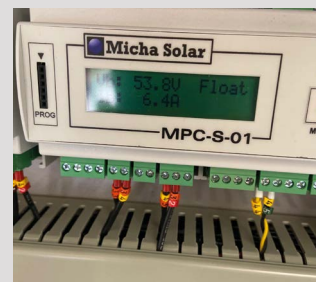

Commercial & Industrial

Small & Medium Businesses
Agriculture
Distribution companies
Industrial companies

TYPICAL SYSTEMS

- Industrial Stand-Alone Power plants
- Solar or Hybrid Power plants for mini grids
- Solar containers
- Self-consumption system
- Solar pumping and water treatment systems

Micha Solar Support centres

Keeping to a policy of providing value for money, even with distant installations, Micha Solar has a network of approved technical partners in Europe, Africa and The Middle East, each with capacity to support end customers and, where necessary, provide a rapid response and intervention from the local Micha Solar Support Centre.

Collaborative innovation

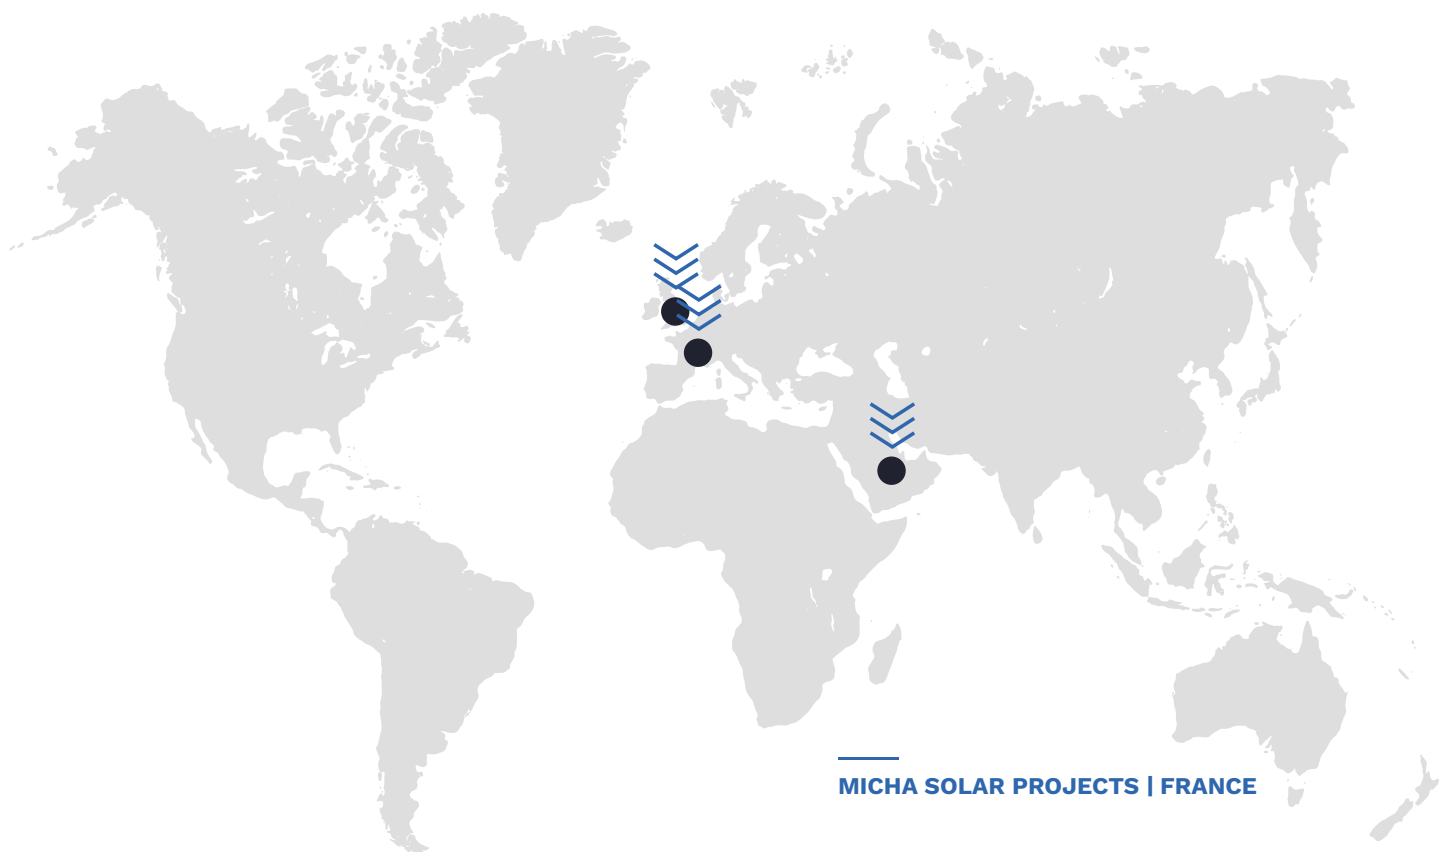

Micha Solar is committed to collaborative innovation by developing synergies with local, institutional or international partners around common development projects. It creates value for all partners with concrete results and thus increases the competitiveness of the parties involved.

The Micha Solar Team

Micha Solar benefits from an international and multicultural technical team, with many years of experience gained from long-term involvement in the Solar Industry, from their engineering department to on-site visits across the Middle East and Africa.

The Highest Quality

Micha Solar remains committed to serving both old and new customers alike, supporting existing equipment in the field while developing new products and technologies to ensure that both Micha Solar and its clients remain at the forefront of the industry. Micha Solar operates under ISO 9001 :2015 and endeavours to provide and maintain the highest level of service.
